

The Basic Line, part of the Seves Glassblock product offering, is an expression of the tradition of the glass block, a material born and employed for its functional characteristics such as the passage of light, to which Seves has added the elevated quality standards typical of its production. Basic is comprised of 4 product ranges: Clear Glass, Special Pieces, Coloured blocks with soft shades, and Coloured Blocks with strong shades. From the functional, clear monochromatic style to the passage of light and refined glass designs, from the coloured series with soft shades to the vivacious and bright colors, the Basic Line is a complete offering of classic glass blocks for all structural requirements, without however, having to renounce the aesthetic taste. The Seves glassblock Basic Line is *Made in Bohemia*, known throughout the world for its ancient crystal traditions and synonymous for reliability and guarantee within the market.

Basic is a line of Seves glassblock that proposes products, 4 x 4 cm, made of high quality glass, produced in the Czech Republic, which is used for architectural purposes. The glass is used for its own characteristics, functional, or for its own aesthetic qualities. The glass is used for its own characteristics, functional, or for its own aesthetic qualities. The glass is used for its own characteristics, functional, or for its own aesthetic qualities.

Openable Frame

Châssis ouvrant / Amazón practicable / Armação móvel / Lüftungsfügel / Otevirací rám / Cadru cu posibilitate de deschidere

For 19x19x8cm glass blocks: designed for room ventilation, the painted aluminium openable frame can house 1, 2 or 4 square blocks.
Model A: 1 place openable frame (19x19x8cm). Overall dimensions 21,5x22,5x9cm*.
N° Pieces/Box: 1.
Model B: 2 place openable frame (19x19x8cm). Overall dimensions 21,5x42,5x9cm*.
N° Pieces/Box: 1.
Model C: 4 place openable frame (19x19x8cm). Overall dimensions 42x42,5x9cm*.
N° Pieces/Box: 1.

* the dimensions refer to the external shape of the frame.

Pour briques de verre format 19x19x8cm: conçu pour l'aération des locaux, le châssis ouvrant est réalisable en aluminium peint et peut recevoir 1, 2 ou 4 briques carrées.
Modèle A: Châssis ouvrant 1 place (19x19x8cm). Dimensions 21,5x22,5x9cm*.
Nbre de Pièces/Carton: 1.
Modèle B: Châssis ouvrant 2 places (19x19x8cm). Dimensions 21,5x42,5x9cm*.
Nbre de Pièces/Carton: 1.
Modèle C: Châssis ouvrant 4 places (19x19x8cm). Dimensions 42x42,5x9cm*.
Nbre de Pièces/Carton: 1.

* les dimensions exprimées se réfèrent aux volumes extérieurs.

Para bloque de vidrio de formato 19x19x8cm: proyectado para la ventilación de los locales, el armazón practicable es de aluminio pintado y puede albergar 1, 2 ó 4 bloques cuadrados.
Modelo A: Armazón practicable 1 puesto (19x19x8cm). Dimensiones 21,5x22,5x9cm*.
N° piezas/caja: 1.
Modelo B: Armazón practicable 2 puestos (19x19x8cm). Dimensiones 21,5x42,5x9cm*.
N° piezas/caja: 1.
Modelo C: Armazón practicable 4 puestos (19x19x8cm). Dimensiones 42x42,5x9cm*.
N° piezas/caja: 1.

* las dimensiones hacen referencia expresamente al bulto externo de los embalajes.

Projetado para a ventilação de locais, a armação móvel é em alumínio pintado branco e pode alojar 1, 2 ou 4 blocos no formato quadrado.
Modelo A: Armação móvel para 1 peça (19x19x8cm). Dimensões 21,5x22,5x9cm*.
N° peças/caixa: 1.
Modelo B: Armação móvel para 2 peças (19x19x8cm). Dimensões 21,5x42,5x9cm*.
N° peças/caixa: 1.
Modelo C: Armação móvel para 4 peças (19x19x8cm). Dimensões 42x42,5x9cm*.
N° peças/caixa: 1.

* as dimensões se referem à forma externa da armação.

Für Glasbausteine im Format 19x19x8cm: konzipiert für die Belüftung von Räumen, der Lüftungsfügel besteht aus lackiertem Aluminium und kann 1, 2 oder 4 quadratische Glasbausteine aufnehmen.
Modell A: Lüftungsfügel 1 Stein (19x19x8cm). Abmessungen 21,5x22,5x9cm*.
Stückzahl/Karton: 1.
Modell B: Lüftungsfügel 2 Steine (19x19x8cm). Abmessungen 21,5x42,5x9cm*.
Stückzahl/Karton: 1.
Modell C: Lüftungsfügel 4 Steine (19x19x8cm). Abmessungen 42x42,5x9cm*.
Stückzahl/Karton: 1.

* Außenabmessungen des Rahmens.

Pro skleněné tvárnice 19x19x8cm: hliníkový otevirací rám opatřený nátěrem byl navržen pro ventilaci místností a lze do něj umístit 1, 2 nebo 4 čtvercové tvárnice.
Model A: otevirací rám pro 1 tvárnici (19x19x8cm). Celkové rozměry 21,5x22,5x9cm*.
Počet ks/karton: 1.
Model B: otevirací rám pro 2 tvárnice (19x19x8cm). Celkové rozměry 21,5x42,5x9cm*.
Počet ks/karton: 1.
Model C: otevirací rám pro 4 tvárnice (19x19x8cm). Celkové rozměry 42x42,5x9cm*.
Počet ks/karton: 1.

* rozměry se vztahují k vnějšímu tvaru rámu.

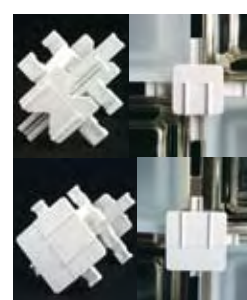

Pentru cărămizi de sticlă 19x19x8cm: proiectat pentru ventilarea încăperilor, cadru este realizat din aluminiu vopsit cu culoare albă și poate conține 1, 2 sau 4 cărămizi într-un format pătrat.
Modelul A: Cadru cu posibilitate de deschidere cu 1 loc (19x19x8cm). Dimensiuni 21,5x22,5x9cm*.
Nr. buci/caută: 1.
Modelul B: Cadru cu posibilitate de deschidere cu 2 locuri (19x19x8cm). Dimensiuni 21,5x42,5x9cm*.
Nr. buci/caută: 1.
Modelul C: Cadru cu posibilitate de deschidere cu 4 locuri (19x19x8cm). Dimensiuni: 42x42,5x9cm*.
Nr. buci/caută: 1.

* Dimensiunile se referă la gabaritul extern.

Spacer

Entretroises / Distanciadores / Verlegekreuze / Distanční křížky / Distanțiere

Plastic spacers that vary according to the size of the necessary joint, block thickness and the type of wall (linear or curved): placed between one block and another, they create evenly spaced joints, keeping the framework rod aligned and away from the glass blocks.
- Spacers for 10mm joints and 8cm glass block thickness.
- Spacers for curved walls for 10mm joints and 8cm glass block thickness.
- Spacers for openable frames (joints 16mm).

Accessoires en plastic, qui varient selon les dimensions de l'intervalle voulu, de l'épaisseur de la brique et du type de paroi (linéaire ou courbe): placés entre les briques, ils permettent d'obtenir des intervalles d'une épaisseur constante et régulière, en conservant la barre d'armature alignée et écartée des verres.
- Entretroises pour joints de 10mm et pour épaisseur 8cm.
- Entretroises pour parois courbes pour joints de 10mm et pour épaisseur 8 cm.
- Entretroises pour châssis ouvrant (joints de 16mm).

Accesorios de plástico, se diferencian en función de la dimensión de la junta que se quiere obtener, del espesor del bloque y del tipo de pared (lineal o curva): se colocan entre los bloques para obtener juntas de espesor constante y regular, manteniendo la varilla de armadura alineada y separada de los vidrios.
- Distanciadores para juntas de 10mm y para espesores de 8cm.
- Distanciadores para paredes curvas con juntas de 10mm y para espesores de 8 cm.
- Distanciadores para armazones practicables (juntas 16mm).

Acessórios de plástico para juntas de 10 mm e blocos com espessura de 8 cm que se diferenciam com base no tipo de parede (linear ou curva): colocados entre um bloco e outro têm a função de obter juntas de espessura constante e regular, mantendo o ferro redondo da estrutura alinhado e isolado do bloco de vidro.
- Espaçador para junta de 10mm e para espessura de 8cm.
- Espaçador para paredes curvas para junta de 10mm e para espessura de 8 cm.
- Espaçador para quadros de abertura (junta de 16mm).

Kunststoffzubehör, die Abstandhalter unterscheiden sich jeweils nach der gewünschten Fugenbreite, der Stärke des Glassteins und der Wandart (gerade oder gewölbt): Sie werden zwischen den Glassteinen eingebracht und haben die Funktion, regelmäßige Fugen mit gleichbleibender Stärke zu erhalten, wobei der Bewehrungsstahl seine Ausrichtung nicht verändert und der Abstand zum Glas eingehalten wird.
- Verlegekreuze für 10mm breite Fugen und für 8cm Stärke.
- Verlegekreuze für gebogene Wände für 10mm breite Fugen und für 8cm Stärke.
- Verlegekreuze für Lüftungsfügel (16mm breite Fugen).

Plastové distanční křížky, se liší velikostí podle toho jaká má být dosažená velikost spáry, tloušťkou tvárnice a typem stěny (rovná nebo zaoblená): jsou umístěny mezi dvěma tvárnici, mají za úkol vytvořit pravidelné a stálé spáry a udržet v rovné armovací prut tak aby se nedotýkal skla.
- Distanční křížky pro 10 mm spáry a skleněné tvárnice tloušťky 8 cm.
- Distanční křížky pro zaoblené stěny pro 10 mm spáry a skleněné tvárnice tloušťky 8 cm.
- Distanční křížky pro otevirací rámy (spáry 16 mm).

Accesorii din plastic, diferențiate în funcție de distanța dorită între cărămizi și de tipul de perete (liniar sau curbat): pozate între două cărămizi, ele permit crearea de rosturi constante și regulate între acestea, menținând partea de contact a armăturii aliniată și izolată de cărămizile de sticlă.
- Distanțiere pentru rosturi de 10mm și grosimi de 8 cm ale cărămizilor de sticlă.
- Distanțiere pentru rosturi de 10mm și grosimi de 8 cm ale cărămizilor de sticlă.
- Distanțiere pentru cadre de susținere cu posibilitate de deschidere (rost de 16 mm).
